

Random Number Generator Certificate

Operator: Skill On Net

Operator URL: www.skillonnet.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Skill On Net and found that the RNG complies with the relevant standards.*

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated card shuffling for 6 and 8 deck games. iTech Labs has also evaluated scaling for slots, dice and roulette games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

04 March 2013

* The RNG was tested according to Danish standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
